EXECUTIVE SUMMARY

Executive Summary

Overall, there has been an improvement in the situation of piracy and armed robbery against ships in Asia during January-June 2012 compared to the same period of 2010 and 2011. Although the numbers are still higher than that reported during January-June of 2008 and 2009, this is the first time a downward trend for the half-yearly number of incidents is observed during the four-year period (January-June of 2009-2012).

Notably, incidents reported during January-June of 2011 and 2012 were generally less severe compared to the same period in 2009 and 2010, as most were Category 3 and petty theft incidents. There was only one Category 1 incident reported during January-June 2012, the lowest among the five-year reporting period (January-June of 2008-2012). The number of Category 2 and Category 3 incidents had remained fairly consistent for the recent three years (January-June of 2010-2012).

The improvement in the situation during January-June 2012 mainly occurred in Malaysia, South China Sea and the Straits of Malacca and Singapore. Malaysia reported the lowest number of incidents during January-June 2012 compared to the same period in the past four years. The South China Sea and the Straits of Malacca and Singapore reported a 71% and 50% decrease in the number of incidents during January-June 2012 compared to the same period in 2011 respectively.

While there has been an overall improvement in Asia; the governments, ship owners, ship operators and crew should not be complacent, but instead they should continue to step-up surveillance, exercise vigilance and adopt best management practices when operating in areas with high level of activities.

Situation Update

There has been an improvement in the overall situation of piracy and armed robbery against ships in Asia during January-June 2012 compared to the same period of 2010 and 2011. Although the numbers are still higher than that reported during January-June of 2008 and 2009, this is the first time a downward trend for the half-yearly number is observed during the four-year period (January-June of 2009-2012).

A total of 62 incidents comprising 57 actual incidents and five attempted incidents were reported during January-June 2012. This represents a 29% decrease in the total number of incidents compared to the same period in 2011.

Graph 1 shows the number of incidents reported during January-June of 2008-2012.

Graph 1 – Number of incidents reported during January-June (2008-2012)

Significance Level of Incidents Reported during January-June of 2008-2012

Of the 62 incidents reported during January-June 2012, one was a Category 1 (very significant) incident, 19 were Category 2 (moderately significant) incidents, 15 were Category 3 (less significant) incidents, 22 were petty theft (minimum significant) incidents, and five were attempted incidents. Chart 1 below shows the significance level of actual incidents reported during January-June of 2008-2012.

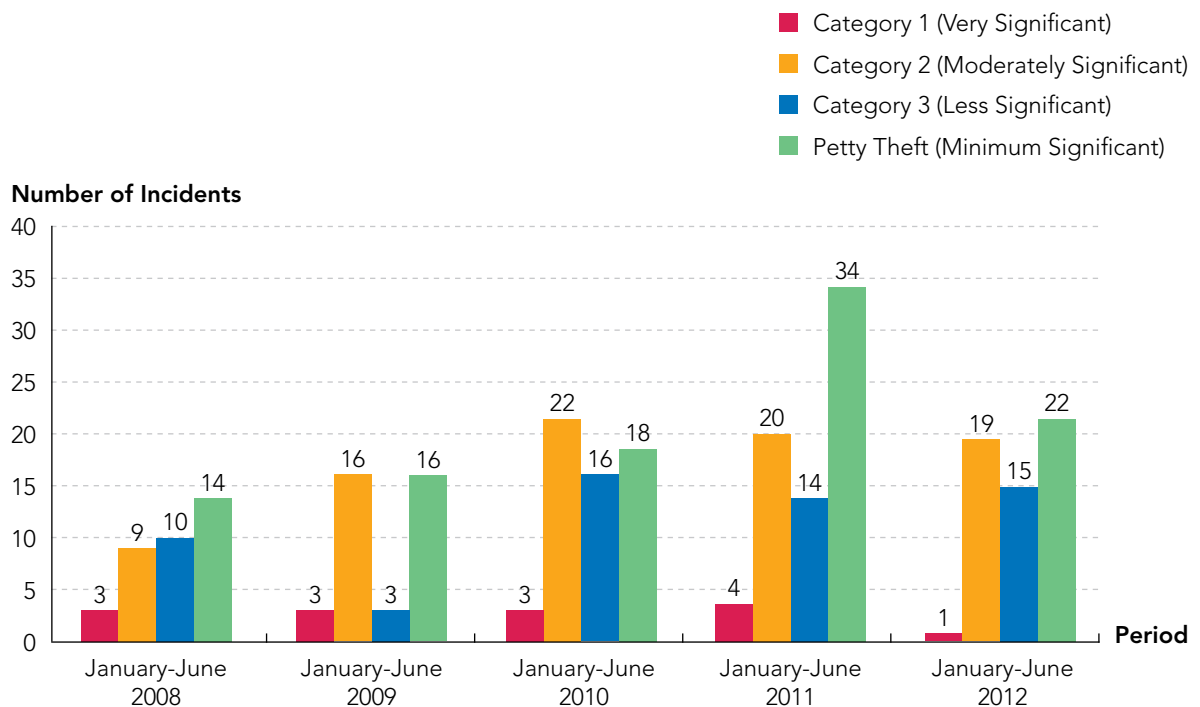

Chart 1 – Significance level of actual incidents reported during January-June (2008-2012)

Among the five-year reporting period, the number of Category 1 incident was the lowest during January-June 2012 with only one incident reported. The incident involved the hijacking of tug boat, *Wantas 6* towing barge, *Wantas VII* at approximately 35 nm off Sarawak in the South China Sea on 17 Apr 12. About 20 pirates boarded the tug boat, held the crew at knifepoint and locked them in the lower deck of *Wantas 6*. On 20 Apr 12, the crew was abandoned onto a lift raft and set adrift, and was rescued by a passing Vietnamese fishing boat on 30 Apr 12. On 26 Apr 12, the Philippine Coast Guard (PCG) found the drifting barge *Wantas VII* at approximately 3.5 nm southeast of the South Islet, Cagayancillo, Palawan, Philippines. The tug boat, *Wantas 6* is still missing at this juncture.

The number of Category 2 and Category 3 incidents has remained fairly consistent during the period of January-June of 2010-2012. Notably, the number of petty theft incidents which peaked at 34 incidents during January-June 2011 had fallen to 22 incidents during the same period in 2012.

Situation Update

Severity of Incidents

Over the five-year reporting period, incidents reported during January-June of 2011 and 2012 were generally less severe compared to the same period in 2009 and 2010 as most were Category 3 and petty theft incidents. Table 1 below shows the percentage of the various significance levels of incidents reported during January-June of 2008-2012.

Significance Level	Jan-Jun 08	Jan-Jun 09	Jan-Jun 10	Jan-Jun 11	Jan-Jun 12
Category 1	8%	8%	5%	6%	2%
Category 2	25%	42%	37%	28%	33%
Category 1+2	33%	50%	42%	34%	35%
Category 3	28%	8%	27%	19%	26%
Petty Theft	39%	42%	31%	47%	39%
Category 3+Petty Theft	67%	50%	58%	66%	65%

Table 1 – Percentage of significance level of incidents reported during January-June (2008-2012)

Category 1 and 2 Incidents

The more severe incidents comprising the Category 1 and Category 2 incidents were at its highest in overall numbers during January-June 2009 when 50% of the total number of incident were either Category 1 or Category 2. This proportion dropped to 42% in the following year (January-June 2010). The situation further improved during the same period in 2011 and 2012 when 34% and 35% of the total number of incidents was either Category 1 or Category 2 respectively.

Over time, the incidents had been less severe after January-June 2009, and it stabilised during January-June 2011 and January-June 2012, with the lowest number of Category 1 incident reported during January-June 2012.

Category 3 and Petty Theft Incidents

With the exception of January-June 2009, majority of the incidents reported during the five-year reporting period were either Category 3 or petty theft incidents. These incidents mostly occurred at ports and anchorages where the robbers usually operated in small groups of two to three men and were opportunists in nature.

Under the cover of darkness, the robbers boarded the vessel taking advantage of reduced visibility and the crew's fatigue after the day's work. In some cases, the robbers boarded the vessels noting that there was a lax in security watch when the crew was busy with cargo operations. The ReCAAP ISC urges the authorities to step up surveillance at ports and anchorages; and recommends that ship masters and crew maintain adequate security watch, especially during hours of darkness and cargo operations.

Status of Ships

Of the 57 actual incidents reported during January-June 2012, 13 involved ships while underway and 44 involved ships at anchor/berth. Of the 13 incidents, one was a Category 1 incident, 10 were Category 2 incidents and two were petty theft incidents. Of the 44 incidents involved ships at anchor/berth, nine were Category 2 incidents, 15 were Category 3 incidents and 20 were petty theft incidents. Predominantly, more severe incidents occurred while vessels were underway. However, during January-June 2012, about half of the total number of Category 2 incidents involved vessels at anchor. These incidents occurred at the ports and anchorages of Bangladesh, India and Vietnam involving robbers who operated in groups of 7-9 and >9, and were, armed with knives or machetes. For incidents involving vessels while underway, the pirates/robbers were armed with knives, machetes and/or gun (in three of the 13 incidents), and usually targeted cash, crew's personal belongings such as laptops, mobile phones or cargo that the vessel was carrying such as scrap metal.

All Category 1 incidents involved vessels while underway throughout the five-year reporting period. Of the 14 Category 1 incidents reported during January-June of 2008-2012, 11 incidents involved pirates/robbers in groups of between 7-20, and 12 incidents involved them armed with guns. Of these incidents, nine incidents involved the hijacking of merchant vessels, four incidents involved the loss of cash and crew's personal belongings and one involved a crew being killed. Notably, eight out of the nine hijacking incidents involved tug boats towing barges. Tug boats are lucrative targets for attack and hijack. The slow speed of tug boats and their low freeboard with cargo onboard have made it vulnerable for boarding. With relatively cheaper market price for a second-hand tug boat compared to a brand new one, the demand for such second-hand vessels has possibly contributed towards the increase in incidents involving the hijacking of tug boats and barges in recent years.

Table 2 – Location of Incidents during January-June (2008-2012)

The overall situation during January-June 2012 has improved compared to the same period in the past two years. The improvements mainly occurred in the Southeast Asian region in Malaysia, South China Sea and the Straits of Malacca and Singapore.

South Asian region

No incident was reported in the Arabian Sea and the Bay of Bengal during January-June 2012 compared to the same period in 2011 when four attempted incidents were reported in the Arabian Sea and one attempted incident in the Bay of Bengal. The ReCAAP ISC notes that the number of incidents reported in India have decreased while the number in Bangladesh had increased. Details of the situation in Bangladesh can be found in Part Two of this report.

Situation Update

Southeast Asian region

The improvement in this region was apparent in Malaysia, South China Sea and the Straits of Malacca and Singapore during January-June 2012 compared to the same period in 2011.

Malaysia reported a total of two incidents during January-June 2012 which was the lowest among the five-year reporting period. As for the South China Sea, the total number had fallen to four incidents during January-June 2012, a 71% improvement compared to the same period in 2011. Similarly, the Straits of Malacca and Singapore had also reported a 50% decline in the total number of incidents. Fourteen incidents were reported in the Straits of Malacca and Singapore during January-June 2011, and this had decreased to seven incidents during January-June 2012. Although the number was still higher compared to the same period of 2008-2010, more can be done by the littoral States and the shipping community. The ReCAAP ISC encourages the littoral States to continue with their surveillance, enforcement and presence in the Straits of Malacca and Singapore.

Details of the situation in Malaysia and the Straits of Malacca and Singapore is described in Part Two of this report.

PART

Analysis of Incidents by Location

Port and anchorages in Bangladesh

The incidents of robbery reported onboard vessels anchored off the port of Chittagong, Bangladesh fluctuated throughout the period of January-June of 2008-2012. A total of seven incidents were reported during January-June 2012, an increase compared to the same period in 2011, but lower than that reported during January-June 2010. Of the seven incidents reported during January-June 2012, the authorities had successfully apprehended the robbers and recovered the stolen item in two of the incidents involving *OXL Lotus* and *Andakini* due to timely reporting of incident to the port authorities and the Bangladesh Coast Guard.

Majority of the incidents occurred at the port of Chittagong are petty theft incidents that involved robbers armed with knives and machetes which were used to cut ropes and other items found onboard the ships. On some occasions, knives were used to threaten the crew when they spotted the robbers onboard their vessels. In all these incidents, the crew were not injured, and the loss of ship's stores, mainly mooring ropes was reported, a common trend observed during the same period in previous years.

Map 2 shows the number and significance level of incidents reported in the port and anchorages of Chittagong during January-June of 2008-2012.

Analysis of Incidents by Location

Malaysia

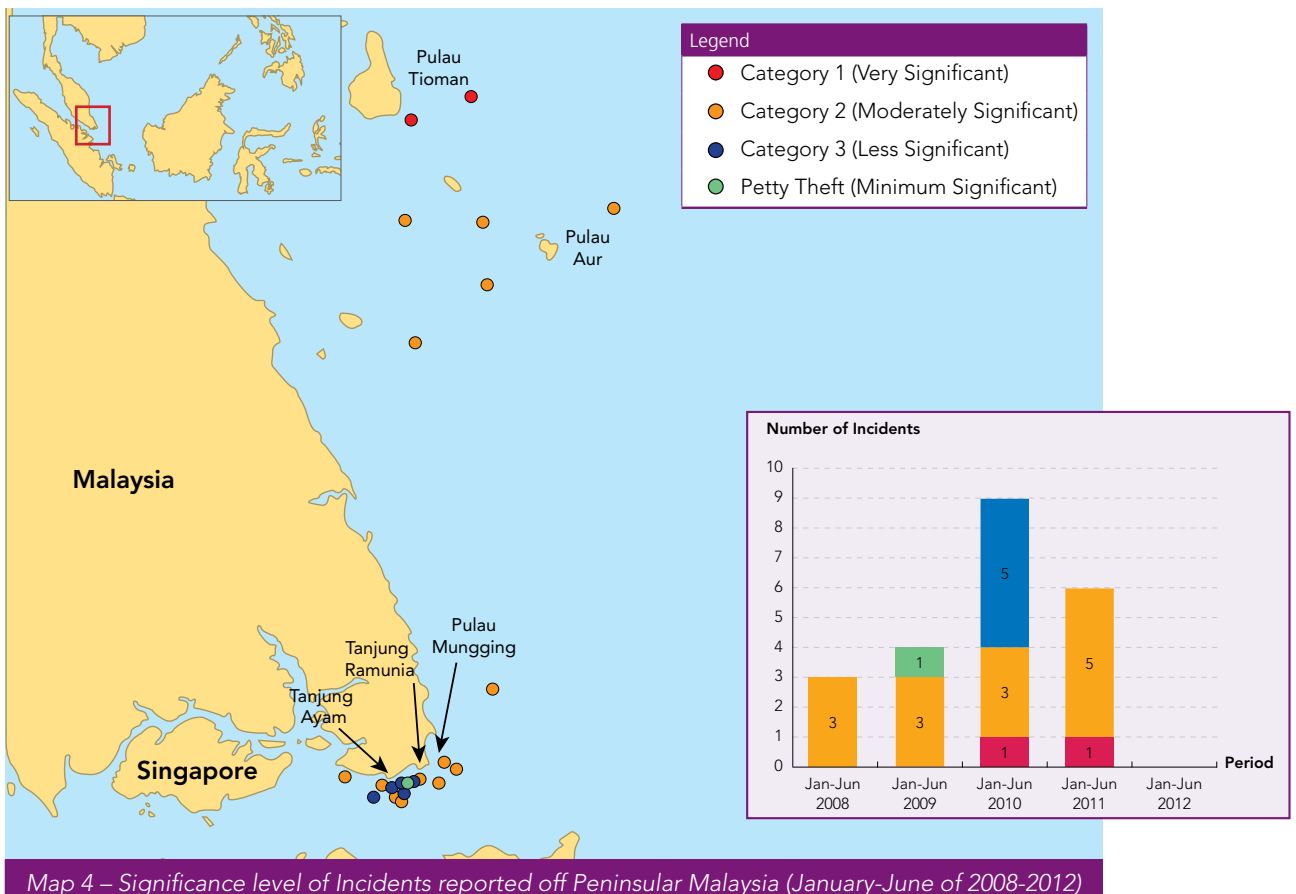

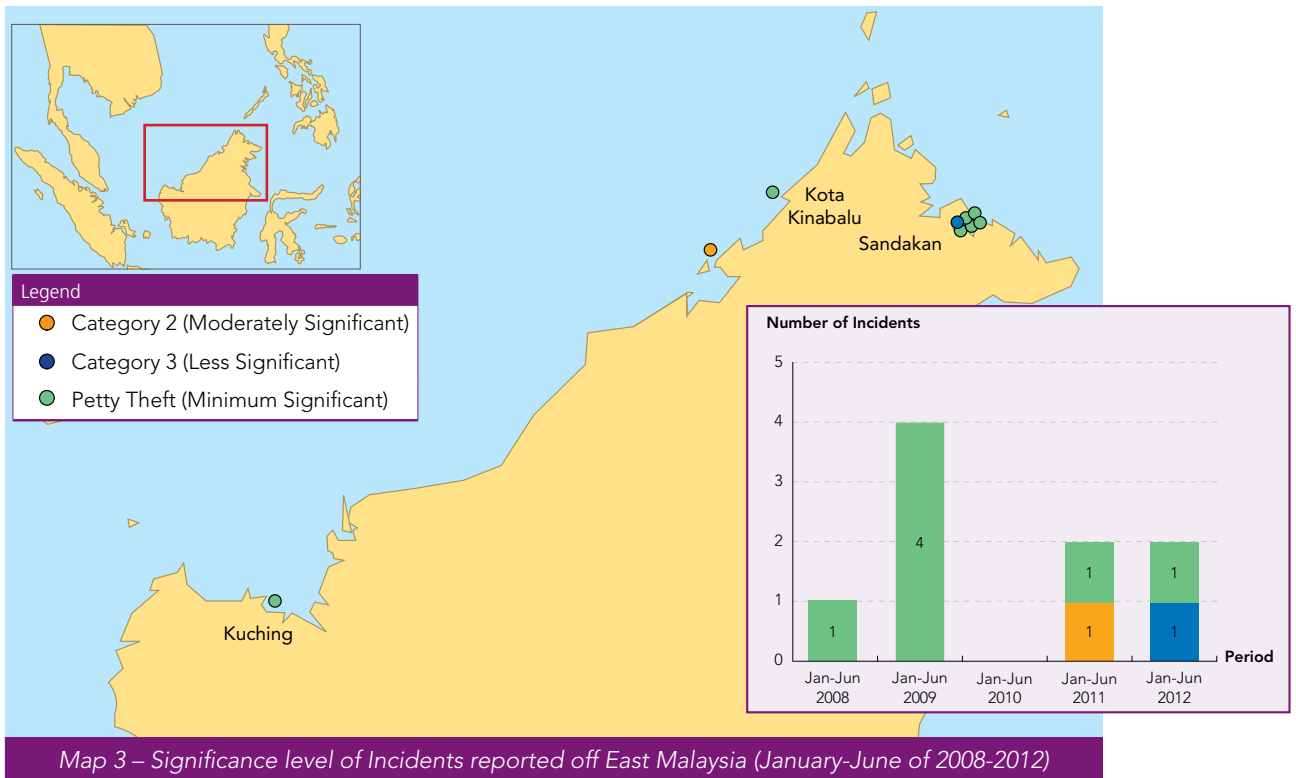

For the first time, no incident was reported at the ports and anchorages or the waters off Peninsular Malaysia. However, there were two incidents reported off East Malaysia during January-June 2012. This is the lowest number of incidents reported in Malaysia throughout the five-year reporting period. On 28 Jan 12, chemical tanker, *Golden Foutain* was anchored at the Sandakan Inner Anchorage, Sabah when four robbers armed with long knives boarded the tanker. The duty AB sighted the robbers during his rounds, informed the duty officer immediately. The robbers escaped in their small speed craft with some ship stores when they discovered that the crew had been alerted. The second incident occurred on 17 Jun 12 when tug boat, *Highline 26* and barge, *Highline 22* were anchored at Kuching Anchorage, Sarawak. The master discovered that the stores onboard the barge were missing after the vessels were anchored².

Maps 3 and 4 show the significance level of incidents reported off East Malaysia and Peninsular Malaysia respectively during January-June of 2008-2012. The two incidents reported off East Malaysia were a Category 3 incident and a petty theft incident. The ReCAAP ISC notes that incidents reported off Peninsular Malaysia were relatively more in number and severe in nature compared with that reported off East Malaysia. Of the total 31 incidents reported in Malaysia during January-June 2008-2012, 22 occurred off Peninsular Malaysia and nine off East Malaysia.

Of the 31 incidents, two were Category 1 incidents, 15 were Category 2 incidents, six were Category 3 incidents and eight were petty theft incidents. Of these, the two Category 1 incidents and 14 out of the 15 Category 2 incidents were reported off Peninsular Malaysia. The two Category 1 incidents involved the hijacking of tug boats towing barges – tug boat, *Asta* towing barge, *Callista* on 6 Feb 10 and tug boat, *Marina 26* towing barge, *Marine Power 3301* on 22 Mar 11. Both incidents occurred off Pulau Tioman and the vessels were subsequently found and recovered by their owners.

Of the 14 Category 3 and petty theft incidents, eight occurred off East Malaysia, and six off Peninsular Malaysia.

2. The ReCAAP ISC had verified with the Malaysian Maritime Enforcement Agency (MMEA), who mentioned that the exact location of the incident need to be ascertained. The ReCAAP ISC will review and rectify the location of the incident upon the availability of added information.

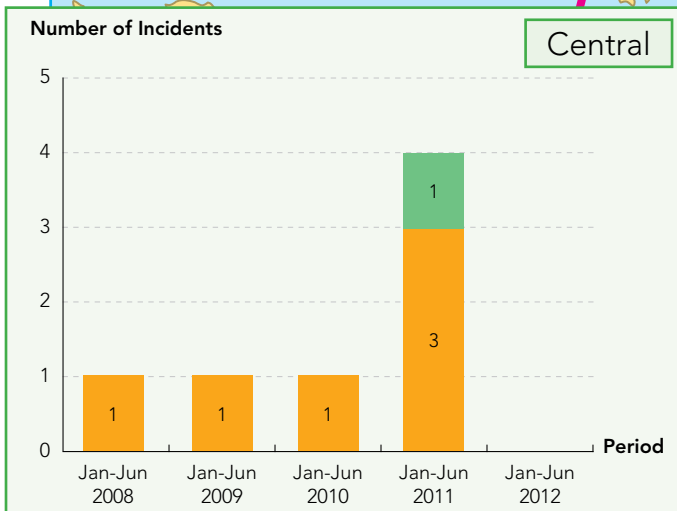

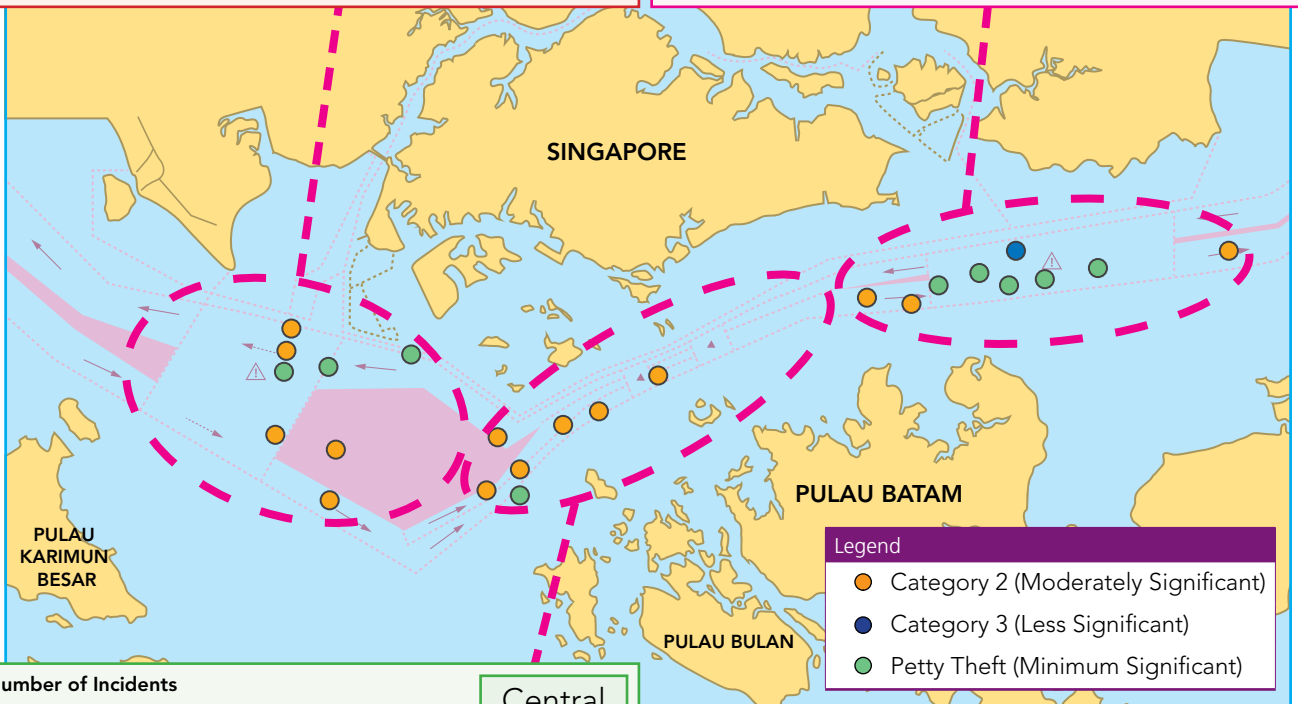

Analysis of Incidents by Location

Straits of Malacca and Singapore

There has been an improvement in the situation in the Straits of Malacca and Singapore with a 50% decrease in the total number of incidents during January-June 2012 compared to the same period in 2011. However, the numbers are still higher than those reported during the same period of 2008-2010.

A total of seven incidents comprising four Category 2 incidents, two petty theft incidents and one attempted incident were reported during January-June 2012. All incidents involved tug boats towing barges. Of the four Category 2 incidents, three involved cargo being discharged from the barges, and one involved the robbers boarded the tug boat, took cash and property from the crew before escaped in their speed boats. Of the six actual incidents, two incidents occurred in the western sector of the Straits of Malacca and Singapore, and four incidents in the eastern sector. No incident was reported in the central sector. Ship masters were urged to exercise heightened vigilance when operating in the Straits of Malacca and Singapore.

CASE STUDY OF SELECTED INCIDENTS

PART

Case Study of Selected Incidents

Piracy incident involving *Ai Maru* on 5 Jun 12

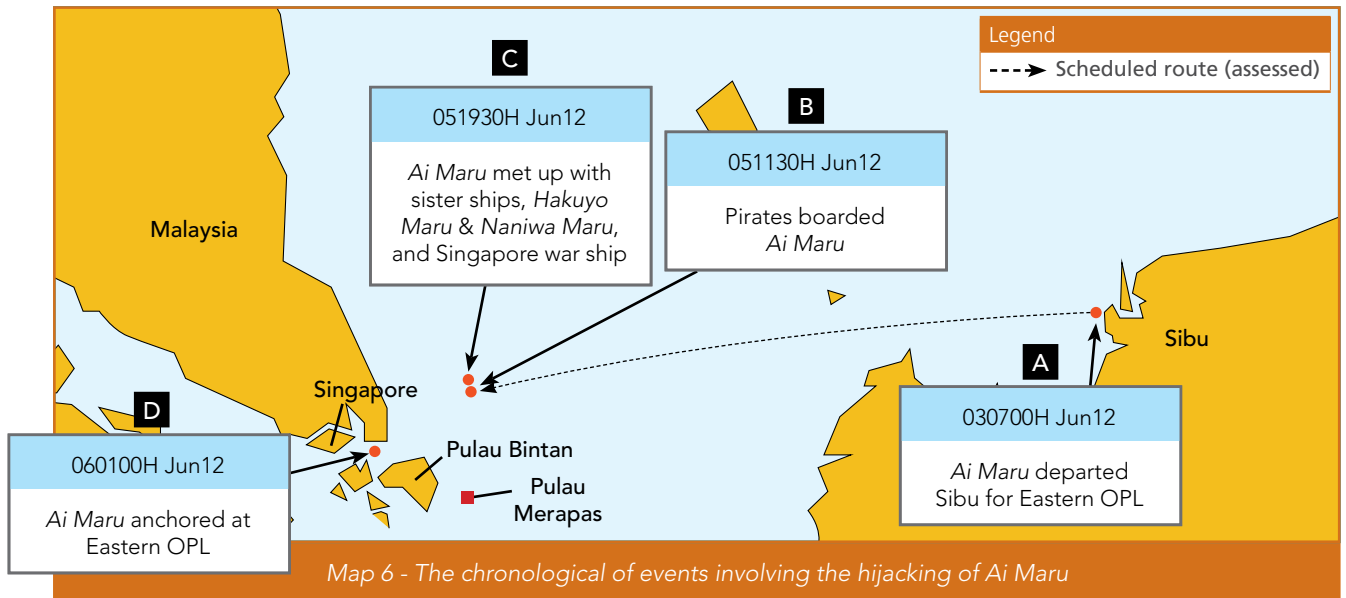

Name of Ship <i>Ai Maru</i>	IMO 7727504
Type of Ship Oil tanker	GT 1007
Flag of Ship Honduras	

On 3 Jun 12 at or about 0700 hrs (local time), the Honduras-registered oil tanker, *Ai Maru* departed Sibuluan, East Malaysia for eastern OPL. On 5 Jun 12 at or about 1124 hrs (local time), six pirates armed with parangs (long knives) in two grey wooden speed boats approached and boarded the oil tanker via the stern at approximately 30 nm from Horsburgh Lighthouse (01° 36.68' N, 104° 54.48' E). The pirates covered their faces with their shirts and were wearing overalls. As the crew did not notice the approach of the two speed boats, they did not have time to activate the SSAS. However, the Chief Officer managed to contact the sister ship, *Naniwa Maru* who in turn informed the ship company who made a police report immediately.

During the first three hours when the pirates were onboard the tanker, the company was able to track the position of *Ai Maru* which was travelling at a slow speed and circling around the location of the boarding.

According to the ship master and crew, the pirates boarded *Ai Maru*, took control of the vessel, tied and locked all crew except the master in the mess room. They tied the master and ordered him to standby on the bridge. About an hour later, the pirates damaged the cabin doors and the communication equipment onboard the vessel.

At or about 1530 hrs (local time), the pirates left the tanker in their speed boat after they noticed a small aircraft flown overhead in the vicinity. They took away all mobile phones, laptops, cash and the crew's personal belongings. After the pirates left *Ai Maru*, the master managed to free himself, took over the command of the vessel and resumed her voyage to the eastern OPL. At or about 1930 hrs (local time), *Hakuyo Maru* and *Naniwa Maru*, the sister ships of *Ai Maru*, and a Singapore war ship, located *Ai Maru*, and escorted her back to the eastern OPL. *Ai Maru* arrived and anchored safely at the eastern OPL on 6 Jun 12 at or about 0100 hrs (local time).

Timely reporting

The Information Fusion Centre (IFC) reported the incident to the ReCAAP ISC, the Malaysian Maritime Enforcement Agency (MMEA) and the Indonesian Navy after the company was alerted that *Ai Maru* might had been hijacked. The ReCAAP ISC understands from the IFC that the Indonesian Navy responded immediately by sending an aircraft to search for *Ai Maru* when they received the information.

From the interview with the master of *Ai Maru*, the pirates intended to take the ship to Pulau Merapas, east of Pulau Bintan, Indonesia. The master mentioned that the pirates abandoned their plan when they saw an aircraft flying overhead *Ai Maru* in the vicinity.

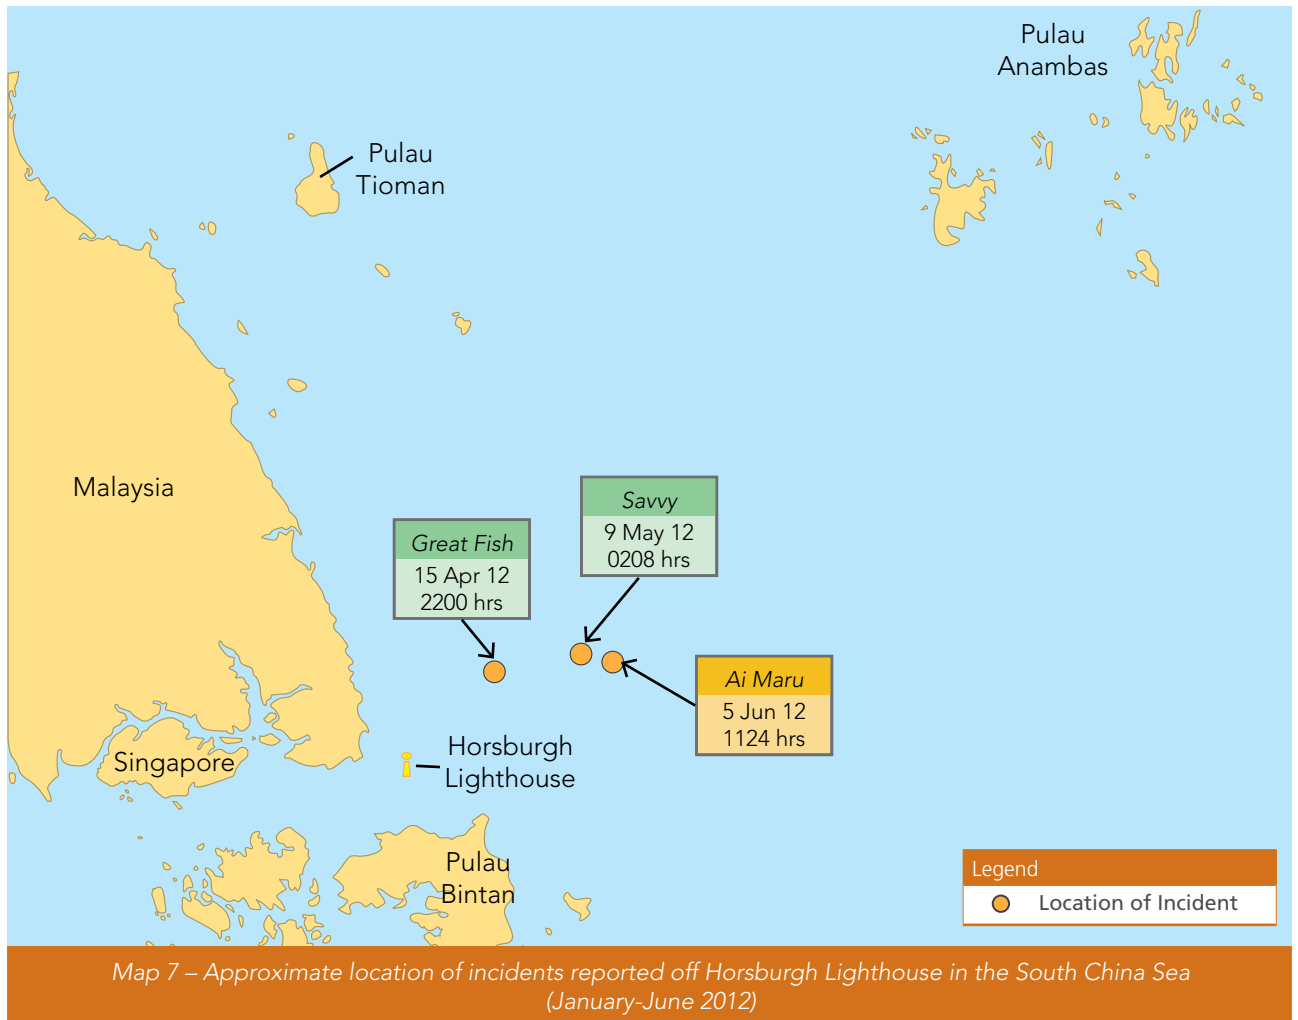

Case Study of Selected Incidents

Observations

The ReCAAP ISC commends the Indonesian Navy for their immediate response by sending an aircraft to locate *Ai Maru*, the shipping company for its timely reporting of the incident, and the IFC for sharing with the ReCAAP ISC and its neighbouring enforcement agencies. Including *Ai Maru*, there have been three incidents reported in the vicinity, off Horsburgh Lighthouse in the South China Sea since January 2012. All three were Category 2 incidents and involved tankers while underway. The crew was not injured in the incidents.

In the incident involving *Savvy* on 9 May 12 which occurred at approximately 30 nm northeast of Horsburgh Lighthouse, between eight to ten pirates boarded the product tanker from two speed boats. Armed with guns and chopping knives, the pirates boarded the vessel using a portable ladder on the poop deck. Nothing was stolen as the crew had been alerted and sealed all access from inside leading to the accommodation blocks and engine room. Failing to gain access, the pirates escaped in their speed boats. The other incident involving *Great Fish* occurred on 15 Apr 12 at approximately 20 nm northeast of Horsburgh Lighthouse. Seven pirates armed with guns and knives boarded the tanker, threatened the crew, stole their money and personal possessions and escaped in a boat.

Map 7 shows the approximate location of the three incidents.

Recommendations

The ReCAAP ISC urges ship masters and crew to maintain vigilance and deploy extra security lookouts when transiting the area. Ship masters are to report all incidents of piracy and armed robbery against ships to the coastal State so that the authorities could respond immediately by despatching their assets to the location of the incident, as in the *Ai Maru* incident.

PART THREE

Case Study of Selected Incidents

Armed robbery incident involving *Andakini* on 22 Mar 12

Name of Ship <i>Andakini</i>	Flag of Ship Comoros
Type of Ship Oil tanker	

On 22 Mar 12 at or about 0003 hrs (local time), the Comoros-registered oil tanker, *Andakini* was anchored at Chittagong, Bangladesh (22° 15.7' N, 091° 44.5' E) when approximately six robbers armed with knives boarded the vessel from a small wooden boat and escaped with one mooring rope. The master reported the incident to the port authorities and Bangladesh Coast Guard.

On receipt of the information, the Bangladesh Coast Guard responded immediately by deploying a Coast Guard Ship, *Ruposhi Bangla*, which carried out extensive search of the area. At or about 0230hrs (local time) on 22 Mar 12, the Coast Guard personnel managed to apprehend three robbers with the mooring rope.

Map 8 – Approximate location of incident involving *Andakini*

Observations

The ReCAAP ISC commends the Bangladesh Coast Guard who has been actively patrolling the area off the anchorages of Chittagong and responded promptly to the reported incident. As in the incident involving *Andakini*, the prompt reporting by the master to the port authorities and the Bangladesh Coast Guard and the swift responses by these agencies led to the apprehension of the robbers and the recovery of the stolen items.

The ReCAAP Focal Point (Bangladesh) had on several occasions, indicated that ships anchored at the port and anchorages of Bangladesh are not maintaining proper security watch, especially during hours of darkness. Ship masters also did not report the incident promptly to the authorities.

Recommendations

The ReCAAP ISC urges ship masters and crew to maintain vigilance and to deploy extra security lookouts while at anchor. Ship masters are to report all incidents of piracy and armed robbery against ships immediately to coastal State so that the authorities could respond immediately by deploying their assets to assist the victim vessels.

CONCLUSION

Conclusion

Although the situation of piracy and armed robbery onboard ships had improved during the first half of 2012, the numbers are still higher than the same period in 2008 and 2009, although relatively less severe in nature compared to January-June of 2009. Tug boats towing barges continued to be the target in the Straits of Malacca and Singapore. More should be done to ensure presence of the authorities in this region and at ports and anchorages in Indonesia and Bangladesh. Ship masters and crew should do their part by exercising vigilance, adopting best management practices and reporting all incidents to the nearest coastal State and flag State.

Djibouti Regional Training Centre (DRTC) Course on Best Practice for Information Analysis

In recognition of the ReCAAP ISC's experience in the area of analysis, the centre was invited to support the conduct of the Djibouti Regional Training Centre (DRTC) Course on Best Practice for Information Analysis organized by the MARSIC EU project team in Mombasa, Kenya from 26-29 Jun 12. The objectives of the course were to enable the three Information Sharing Centres (ISCs), located at Sana'a in Yemen, Dar es Salam in Tanzania and Mombasa in Kenya to establish their analysis processes, derive tools for analysis, and produce reports for sharing with their National Focal Points (NFPs), governmental agencies and shipping industry.

The ReCAAP ISC shared its experience in information collection, collation, analysis, report writing and dissemination. The other technical aspects of analysis was taught by IMO, EU NAVFOR and Czech Technical University who shared on basis modelling tools used to reflect the work processes in the ISCs, analytical tool developed for the ISCs, and the concept of early warning for the maritime domain to be undertaken by the analysis department of the ISCs.

The meeting noted the need for capacity building among the three ISCs, between the respective ISC with its NFPs, between the ISCs with the local governments and between the ISCs with the shipping industry. Commitment by the local governments of the respective countries in supporting the work and processes as identified within the ISCs and its NFPs are critical and key to ensure success of the ReCAAP model adopted by the ISCs of the DCoC.

Participants and lecturers with the Director-General of Kenya Maritime Authority, Mrs Nancy Karigithu who officiated the opening of the course.

Opening of New Counter-Piracy Operations Centre in Djibouti

A new Djiboutian Naval Operations Centre has been set up with enhanced ship-tracking capabilities. The new centre provides the Djiboutian maritime forces with an enhanced capability to track ship movements in their territorial waters.

EU NAVFOR, whose ships will be conducting exercises in the coming weeks with the Djiboutian Navy and Coast Guard, welcomed the move towards another step in contributing towards the fight against piracy and maritime capacity building in the region.

Interim Guidance for Private Maritime Security Providers

An interim guidance relating to the deployment of Privately Contracted Armed Security Personnel (PCASP) onboard ships and carriage of arms onboard was deliberated at the IMO's Maritime Safety Committee (MSC) Meeting in May 2012 in London.

Following the debate at the working group, the MSC agreed to have an interim guidance for Private Maritime Security Companies (PMSCs) providing contracted armed security personnel onboard ships in the High Risk Area. The guidance covers the following areas:

- PMSC professional certification, including the recommendation that PMSC should seek certification with the relevant national and international private maritime security service standards when these are established. The MSC agreed that the International Organization for Standardization (ISO) would be best placed to develop international standards for PMSCs based on the IMO-developed guidance and with relevant IMO liaison and participation in the ISO process for standards' development.
- PMSC requirements, including the recommendations that PMSC should establish procedures to provide maritime security services to ship owners, ship operators and to comply with all relevant legal requirements;
- Management which including recommendations on selection, vetting and training of personnel for a PCASP team;
- Deployment considerations, addressing the specific aspects of PCASP deployment and the role of the PMSC in ensuring efficient and successful deployments, including communications with the ship owner or operator, and including recommendations relating to management of firearms and ammunition from embarkation to disembarkation and use of force.

Definitions & Classification Methodology

Definitions

Piracy, in accordance with Article 101 of the United Nations Convention on the Law of the Sea (UNCLOS), is defined as:

1. "Piracy" means any of the following acts:
 - a. any illegal act of violence or detention, or any act of depredation, committed for private ends by the crew or the passengers of a private ship or a private aircraft, and directed:
 - (i) on the high seas, against another ship, or against persons or property on board such ship;
 - (ii) against a ship, persons or property in a place outside the jurisdiction of any State;
 - b. any act of voluntary participation in the operation of a ship or of an aircraft with knowledge of facts making it a pirate ship or aircraft;
 - c. any act of inciting or of intentionally facilitating an act described in subparagraph (a) or (b).

Armed Robbery Against Ships, in accordance with the Code of Practice for the Investigation of Crimes of Piracy and Armed Robbery against Ships of the International Maritime Organisation (IMO Assembly Resolution A.1025(26)), is defined as:

2. "Armed robbery against ships" means any of the following acts:
 - a. any illegal act of violence or detention, or any act of depredation, or threat thereof, other than an act of "piracy", committed for private ends and directed against a ship, or against persons or property on board such ship, within a State's internal waters, archipelagic waters and territorial sea;
 - b. any act of inciting or of intentionally facilitating an act described above.

Petty theft is defined as whoever, intending to dishonestly take any moveable property out of the possession of any person/vessel without the person/owner's consent, moves that property for private gains, is said to commit theft. For purpose of classifying an incident as petty theft, the classification methodology is adopted with the following pre-requisites:

- a. Incident meets the criteria to be considered as an act of armed robbery against ships, and
- b. Incident is categorised as a Category 3 incident, and
- c. The robbers who boarded the vessel were not armed or no reports that they were armed, and
- d. The crew of the vessel was not harmed or no reports that the crew was harmed

Methodology in classifying incidents

To provide some perspective on incidents of piracy and armed robbery, the ReCAAP ISC evaluates the significance of each incident in terms of two factors – the level of violence and the economic loss incurred. The indicators for these two factors are as follows:

1. **Violence Factor.** This factor refers to the intensity of violence in an incident, and the three indicators used to determine this are:
 - a. **Type of weapons used.** Incidents of pirates/robbers who board a ship with no visible weapons are generally deemed as less violent compared to those equipped with pistols, knives, machetes, or other dangerous weapons. In cases where more sophisticated weapons are used, such incidents would be considered more violent.
 - b. **Treatment of the crew.** Incidents where pirates/robbers kill or kidnap crew are deemed to be more violent compared to petty thieves who flee upon being noticed. Other cases could include threatening crew members, assault, or serious injury.
 - c. **Number of pirates/robbers engaged in an attack.** As a rule, an incident where a larger number of pirates/robbers were involved would be considered more significant as having a large capacity (as well as probability) for use of force. A larger number of pirates/robbers may also indicate the involvement of gangs or organised syndicates rather than petty and opportunistic pirates who generally operate in small groups.

Appendices

2. **Economic Factor.** This factor takes into consideration the type of the property taken from the ship. Cases of theft of cash or personal effects are generally less significant incidents compared to cases where the entire ship is hijacked either for the cargo onboard or theft of the vessel.

Using these indicators, the ReCAAP ISC classifies all incidents into one of the four categories to determine their overall significance.

Category	Significance of Incident
CAT 1	Very Significant
CAT 2	Moderately Significant
CAT 3	Less Significant
Petty Theft	Minimum Significant

This classification of incidents allows the ReCAAP ISC to provide some perspective of the piracy and armed robbery situation in Asia.

The pirates threatened the crew, stole their money and personal possessions, and escaped in a boat. The crew was not injured. The shipping agent based in Singapore reported the incident to the Singapore's Port Operations Control Centre (POCC) which is also the ReCAAP Focal Point (Singapore). The POCC, in turn notified MRCC Jakarta (Indonesia), MRCC Putra Jaya (Malaysia), the Republic of Singapore Navy (RSN) and the Singapore's Police Coast Guard (PCG). The Vietnam Maritime Security Information Centre also reported the incident to the ReCAAP ISC after they were informed by the ship master. 42 ■	<p><i>Wantas 6</i> Tug boat Malaysia</p> <p><i>Wantas VII</i> Barge</p>	17/04/12 2300 hrs	Approximately 35 nm off Tanjung Dato, Sarawak, Malaysia (South China Sea)	<p>On 12 Apr 12, the tug boat towing a barge departed Langkawi, Malaysia for Tawau, Sabah. The vessels were scheduled to arrive at Tawau on 29 Apr 12. On 26 Apr 12, the owner of the vessels reported to the Malaysian Maritime Enforcement Agency (MMEA) that he lost communication with the master. The owner last communicated with the master on 16 Apr 12 at or about 1000 hrs (local time) when the vessels were passing Pulau Batam, Indonesia.</p> <p>On 26 Apr 12 at or about 1705 hrs (local time), the Philippine Coast Guard (PCG), which is also the ReCAAP Focal Point (Philippines) reported to the ReCAAP ISC that a barge, named <i>Wantas VII</i> was found at approximately 3.5 nm southeast of the South Islet, Cagayancillo, Palawan, Philippines. The PCG boarded the barge and discovered eight containers containing electrical/construction supplies/materials, of which some of them had been forcibly opened. The barge was subsequently towed to Cagayan de Oro City, Northern Mindanao, Philippines.</p> <p>Upon receipt of the report, the ReCAAP ISC alerted all ReCAAP Focal Points, MMEA and the Indonesian authorities about the barge, and requested all to look out for the missing crew and tug boat, <i>Wantas 6</i>.</p> <p>On 30 Apr 12, the MMEA reported to the ReCAAP ISC that the crew of <i>Wantas 6</i> was rescued by a passing Vietnamese fishing boat PY 2647 on 30 Apr 12 at about 1045 hrs (local time) in the South China Sea. The crew was in good health when they were rescued. Upon interviewing the crew, the ship owner learned from them that about 20 pirates boarded and hijacked <i>Wantas 6</i> on 17 Apr 12 at or about 2300 hrs (local time) while the tug boat was underway at approximately 35 nm off Tanjung Dato, Sarawak, Malaysia. The crew was held at knifepoint and locked in the lower deck of <i>Wantas 6</i>. On 20 Apr 12 at or about 2000 hrs (local time), the crew was put on a life raft and set adrift.</p> <p>[ReCAAP Focal Point (Philippines), ReCAAP Focal Point (Vietnam), MMEA]</p>

53 ■	<i>Ai Maru</i> Tanker Honduras 7727504 1007	05/06/12 1124 hrs	Approximately 30 nm off Horsburgh Lighthouse, Singapore (South China Sea)	<p>While underway, six pirates armed with parangs (long knives) in two grey wooden speed boats approached and boarded the oil tanker via the astern. The pirates covered their faces with their shirts and were wearing overalls. As the crew did not notice the approach of the two speed boats, they did not have time to activate the SSAS. However, the Chief Officer managed to contact the sister ship, <i>Naniwa Maru</i> who in turn informed the ship company who made a police report immediately.</p> <p>During the first three hours when the pirates were onboard the tanker, the company was able to track the position of <i>Ai Maru</i> which was travelling at a slow speed and circling around the location of the boarding.</p> <p>According to the ship master and crew, the pirates boarded <i>Ai Maru</i>, took control of the vessel, tied and locked all crew except the master in the mess room. They tied the master and ordered him to standby on the bridge. About an hour later, the pirates damaged the cabin doors and the communication equipment of the vessel.</p> <p>At or about 1530 hrs (local time), the pirates left the tanker in their speed boat after they noticed a small aircraft flown overhead in the vicinity. They took away all mobile phones, laptops, cash and the crew's personal belongings. After the pirates left <i>Ai Maru</i>, the master managed to free himself, took over the command of the vessel and resumed her voyage to the eastern OPL. At or about 1930 hrs (local time), <i>Hakuyo Maru</i> and <i>Naniwa Maru</i>, the sister ships of <i>Ai Maru</i>, and a Singapore war ship, located <i>Ai Maru</i> and escorted her back to the eastern OPL. <i>Ai Maru</i> arrived and anchored safely at the eastern OPL on 6 Jun 12 at or about 0100 hrs (local time).</p> <p>[ReCAAP Focal Point (Singapore)]</p>

Maritime Safety Committee (MSC) Circulars 1333 and 1334 on preventing and suppressing acts of piracy and armed robbery against ships

The Maritime Safety Committee (MSC) at its eighty-sixth session (27 May 09 to 5 Jun 09) reviewed MSC/Circ.622/Rev.1 on “Recommendations to governments for preventing and suppressing piracy and armed robbery against ships” and MSC/Circ.623/Rev.3 on “Guidance to ship owners, ship operators, ship masters and crew on preventing and suppressing acts of piracy and armed robbery against ships”.

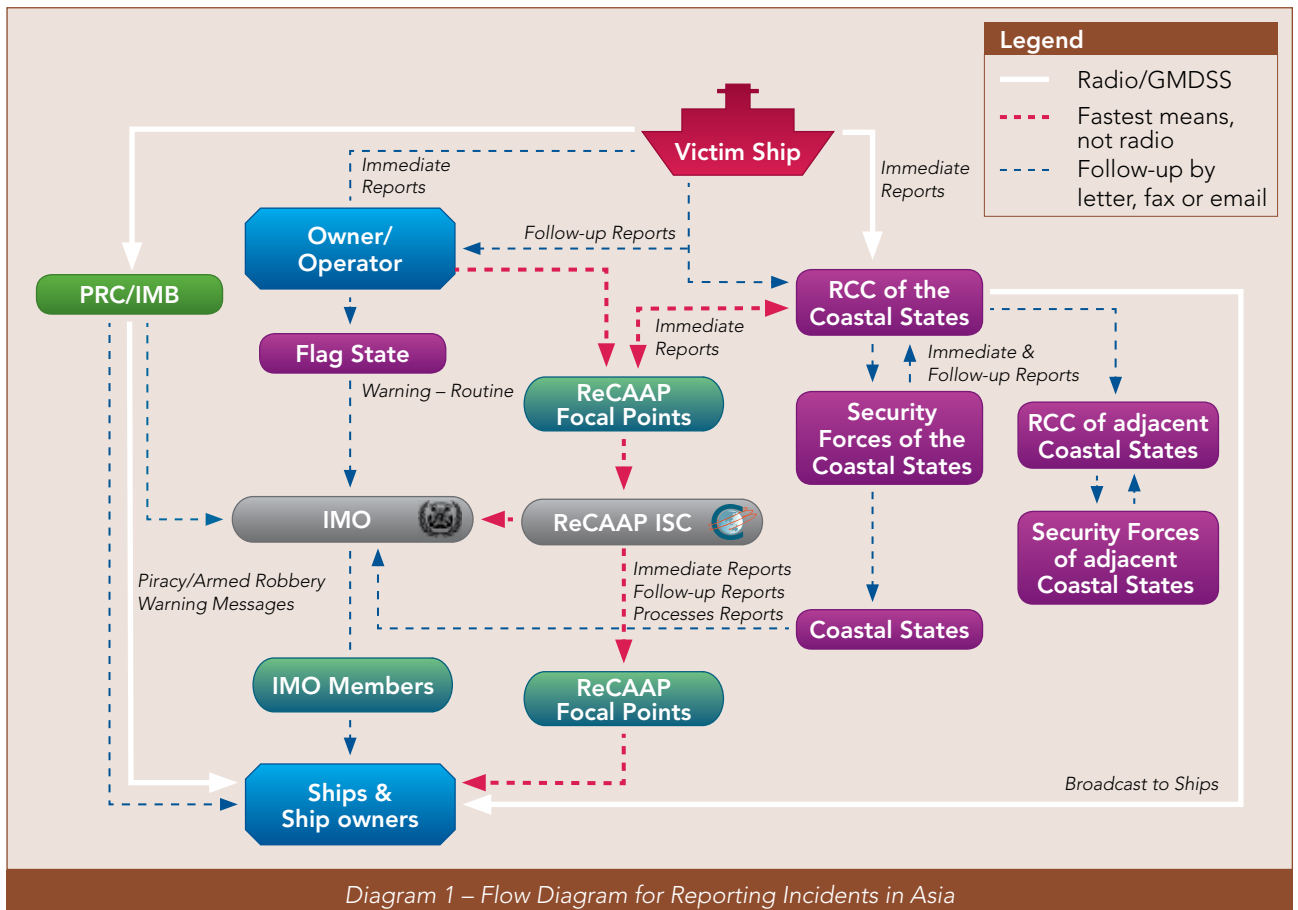

In the revised MSC circulars³, the ReCAAP ISC is recognized as one of the agencies in preventing and suppressing piracy and armed robbery against ships in Asia. The revised circulars include a flow diagram on the procedure for reporting incidents of piracy and armed robbery against ships in Asia. Refer to Diagram 1 on the flow diagram.

The reporting procedure stipulates that ship masters are to report all incidents of piracy and armed robbery against ships to the Rescue Coordination Centre (RCC) of the coastal States immediately; and ship owners and ship operators to report the incidents to the ReCAAP Focal Points. Prompt reporting to the nearest coastal State also facilitates ‘ownership’ to the incident and enable the law enforcement agencies to address appropriate responses as these incidents are under their respective national policies. Some of the ReCAAP Focal Points are the RCCs of the ReCAAP Contracting Parties. The contact details of the ReCAAP Focal Points/Contact Point are shown in Table 2.

Recommendation

Multi-channel reporting and timeliness of reports enable the ReCAAP ISC to issue Incident Alerts to warn seafarers and the maritime community about the incidents. In addition, it provides inputs from alternate sources which facilitate data verification, information collation and comprehensive analysis in deriving trends and patterns, and production of value-added reports for sharing with ship masters, ship owners, ship operators and the maritime community at large.

3. The MSC.1/Circ.1333 and MSC.1/Circ.1334 have replaced MSC/Circ.622/Rev.1 and MSC/Circ.623/

Notes:

1. The RCCs of some ReCAAP Contracting Parties are also their ReCAAP Focal Points. These Focal Points also disseminate incident information internally to their respective RCCs, maritime authorities and law enforcement agencies as appropriate.
2. The ReCAAP Focal Points are governmental agencies designated by the respective Contracting Parties of the ReCAAP Agreement.
3. The incident reporting process in Asia does not change other reporting processes for incidents already in practice.

The ReCAAP ISC makes use of various sources of information in producing its reports. The primary source is the ReCAAP ISC's Information Network System (IFN). Where necessary, the ReCAAP ISC leverages on other secondary sources of information, including those from the International Maritime Organization (IMO), the Information Fusion Centre (IFC), the Malaysian and Indonesian authorities, the commercial entities (such as ship owners, ship operators, ship agents etc.) and other publicly available sources to facilitate analysis on patterns and trends, and to make recommendations. The ReCAAP ISC makes every effort to acknowledge these sources.
